

**[DRAFT] Data Sheet E – Results of Internal Review Committee**

Date of Review/Recommendation: November 29, 2010

Water Body Under Evaluation:

Water Body ID #: 1486  
Name: Steins Creek (Class C)  
Length of Segment: 16.6 miles  
County (ies): Laclede and Wright

Use Attainability Analysis (UAA) Study:

UAA ID #: 1320  
Submitter: Olsson Associates  
Date(s) Conducted: August 6-7, 2008  
Date Received: October 14, 2008  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.  
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.  
☐ 3-Non-Remedial, Human Caused Condition.  
☐ 4-Hydrologic Modifications.  
☐ 5-Natural Physical Features.  
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in August 2008 and there was no WBCR observed. Farm access road crossed the segment at site #9 as well as used firework debris signifying SCR. No interviews were conducted during the 2008 UAA.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream did not meet the maximum or median depth criteria for WBCR at the survey sites. However, there were multiple pools greater than 1 meter deep along the classified segment that could be used for WBCR. Therefore the committee recommends that WBCR be retained and SCR be added.

**Committee Recommendation:**

☐ Add Use ☒ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
